DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Morinaga (JP 06-243562 A).

As per claim 10, Morinaga (JP 06-243562 A) discloses an optical disk drive for driving an optical disk (12), wherein the optical disk (12) has a center hole, the optical disk drive comprising: a base (e.g., 7) for holding the optical disk (12); a protrusion (3) protruding out from the base (7) that extends through the center hole of the optical disk (12) when carrying the optical disk (12); and at least one hook (11) slidably installed on the protrusion (3), wherein when the disk drive stops, the hook (11) is retracted to within the edge of the protrusion (3) (due to elastic means (13)) and when disk (12) is rotated up to a predetermined speed, the hook (11) extends out from the edge of the protrusion (3) to hook the optical disk (12).

Art Unit: 2627

As per claim 13, wherein in high-speed rotation, the hook (11) slides and extends out to hook the optical disk (12) by the centrifugal force obtained by the rotation.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morinaga (JP 06-243562 A).

See the description of Morinaga (JP 06-243562 A), *supra*.

With regard to claim 14, Morinaga (JP 06-243562 A) does not expressly disclose wherein the base is a tray slidably installed in the housing of a disk drive.

Official notice is taken that disk trays for slidably moving into and out of a disk device are notoriously old and well known and ubiquitous in the art; such Officially noticed fact being capable of instant and unquestionable demonstration as being well-known.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the disk chuck mechanism of Morinaga (JP 06-243562 A) as being applicable to a conventional disk device with a slidable tray.

The rationale is as follows: one of ordinary skill in the art would have been motivated to have provided the disk chuck mechanism of Morinaga (JP 06-243562 A) as being applicable to a conventional disk device with a slidable tray in order to prevent a disk from springing out of a

Art Unit: 2627

conventional disk tray while still rotating at a predetermined speed, in the manner taught and suggested by Morinaga (JP 06-243562 A).

Allowable Subject Matter

Claims 1, 6, 8 and 9 are allowed.

Claims 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

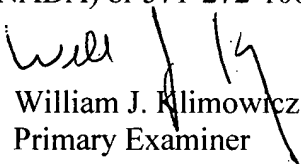

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
